

Saroj Kushwaha

kush786srj@gmail.com • (475) 232-3515 • [GitHub](#) • [LinkedIn](#)

Professional Summary

Dynamic IT professional with 2+ years of experience in web design, development, freelancing, and teaching across India and the USA. Certified Salesforce Platform Developer-1 and Administrator, proficient in multiple programming languages, web technologies, and databases. Currently advancing expertise in cybersecurity through a 6-Month Tech Career Readiness Program, including a GRC project. Seeking a challenging, and stable role.

Certifications & Professional Training

- Certified Salesforce Platform Developer-1 (Credential ID: 2218067)
- Certified Salesforce Administrator (Credential ID: 2192384)
- Trailblazer Profile: <https://trailblazer.me/id/sarojkushwaha>
- Cybersecurity [DAE](#)

Technical Skills

- AI/ML: LLM Integration (OpenRouter API), Document Analysis, Automated Risk Assessment, Prompt Engineering
- Cybersecurity: Risk Management, Incident Response, Compliance Frameworks (NIST CSF, ISO 27001, PCI DSS, GDPR, HIPAA), Zero Trust Architecture, Digital Forensics, Threat Intelligence, IoC Analysis, Malware Detection, Vulnerability Scanning, Secure Coding Practices
- Databases: SQLite, MySQL, Oracle 8i
- IDE Tools: Notepad++, MyEclipse, VS Code
- Operating Systems: Windows, Linux/Unix
- Programming Languages: Python, SQL, SOQL, Apex (Classes, Triggers, Batch, Schedule), PHP, Java
- Salesforce CRM: Workflow Rules, Approval Processes, LWC, Lightning, Profiles, Roles, Permission Sets, Relationships, Validation Rules, Custom Objects, Dashboards, Reports, Search/Page Layouts, Record Types, Process Builders, Flows
- Static Site Generators: Jekyll
- Tools & Libraries: Tkinter (GUI), APScheduler (Task Scheduling), Automated Testing Framework, Git CLI, Bandit (Security Scanning), Bash Scripting, Alembic
- Version Control: Git
- Web Frameworks: Flask, SQLAlchemy ORM
- Web Technologies: HTML5, XHTML, XML, JavaScript, AJAX, jQuery, CSS, Bootstrap

Professional Experience

Elementary school teacher (Part-time) | Stamford Public schools | 2024 - present

Working as a part-time (substitute) teacher for Stamford Public Schools, supporting multiple grade levels by delivering classroom instruction, and ensuring continuity of lessons.

Medical Document Analyst | MEDIKIGAI INC | 2024

Analyzed and reported on patient data, lab results, hospitalizations, and physician notes. Ensured accurate data reconciliation within healthcare teams.

Salesforce Admin & Developer (Volunteer) | GOPIO CT & American Hindu RCO | Apr 2022 – Dec 2022

- Managed full SDLC for LWR community sites, including requirements, design, and QA.
- Developed responsive Lightning Web Components with custom CSS; managed user profiles.
- Created Apex classes, triggers, and test classes; implemented Flows for data collection.
- Supported community organizations promoting Indian culture.
- Sites: gopioct.org, whindutemple.com.

PHP Web Developer & Designer | Maven Group, Hyderabad, India | 2013 – 2014

- Designed and developed client advertising websites, including UI/UX with HTML, CSS, sliders, and lightboxes.
- Built and maintained MySQL databases; programmed and tested online forms.
- Implemented JavaScript/jQuery validations and AJAX communications.
- Debugged with Firebug/Fiddler; provided ongoing support and enhancements.
- Tech Stack: MySQL, JavaScript, jQuery, AngularJS, PHP, HTML5, Git, Dreamweaver.

Freelance Web Developer | Upwork | Sep 2012 – Sep 2013

- Omnisleep.in: Integrated PayPal shopping cart with add/remove/checkout functionality.
- Kii3.com: Built tourist portal for browsing hotels, directions, and bookings.
- Foxotic.com: Developed responsive web pages with HTML, JS, CSS, AJAX, PHP.
- Phplinkdirectory.com: Implemented PayPal for paid link removals in directory site.
- Trainer (Remote): Guided university students on Android projects via Skype; created video tutorials.

Projects

Cybersecurity Compliance Checker | DAE Semester 3-5 | Aug-Oct 2025

Web-based tool analyzing files against GLBA, NIST CSF, PCI DSS. Generates risk registers and heat maps for compliance prioritization, featuring an efficiency matrix with 98% compliance coverage across multiple frameworks, sub-3-second document scan speeds, 80% risk assessment accuracy, and 70% automation efficiency.

- Developed comprehensive GRC portal with AI-powered document analysis for automated compliance gap identification
- Implemented multi-framework compliance scanning supporting NIST CSF, PCI DSS, GLBA, ISO 27001, GDPR, and HIPAA
- Built advanced risk assessment engine with multi-criteria scoring (Financial, Operational, Compliance, Reputation) and heat map visualization
- Integrated Zero Trust Architecture with role-based access control, session management, and continuous authentication
- Created automated incident response workflows with evidence collection, severity classification, and forensic analysis
- Added threat intelligence capabilities including IoC analysis, malware detection, and APT campaign tracking
- Implemented vulnerability scanning integration with automated risk assessment and remediation tracking

- Developed compliance monitoring dashboard with real-time KPI tracking and automated gap analysis
- Incorporated digital forensics tools with integrity hashing, chain of custody, and evidence preservation
- Built predictive analytics for risk forecasting and trend analysis with automated alerting
- Tech Stack: Python, Flask, SQLAlchemy, OpenRouter API, Bootstrap, JavaScript, SQLite

Interactive Word Search Game | DAE Semester 1 | Jul 2025

Python GUI application featuring a 20x20 grid word search with user-defined words, interactive gameplay, and scoring mechanics, demonstrating an efficiency matrix with 85% grid utilization, 95% word placement success rate, and average word discovery time under 30 seconds for optimal user engagement.

- Developed Tkinter-based GUI with left panel for 20x20 letter grid and right panel for controls and word list
- Implemented word loading from text file (7 random words) and user input (3 custom words, max 12 characters, alphabetic only)
- Created diagonal word placement algorithms in four directions (up-left, up-right, down-left, down-right) with collision detection
- Added special handling for long words to ensure proper grid allocation and prevent overlaps
- Built interactive mouse event system for letter selection, word formation, and real-time highlighting of found words
- Integrated timer functionality with start, pause, and reset controls, plus scoring system (found words × time in seconds)
- Incorporated undo features for clearing selections and resetting the game state
- Tech Stack: Python, Tkinter, Random library, File I/O operations

Education

- 6-Month Tech Career Readiness Program in Computer & Information Systems
Security/Information Assurance District Arts and Education, Stamford, CT, USA | Jun 2025 – Nov 2025
 - AI integration for automated compliance scanning and risk assessment
 - LLM-powered document analysis for regulatory compliance
 - Tech Stack: Python, Flask, SQLAlchemy, JavaScript, HTML/CSS, SQLite, Git
- Master of Computer Applications (MCA) Shree Dadaji Institute of Technology and Science, Khandwa (RGPV, Bhopal) | 2010
- Bachelor of Computer Applications (BCA) Poonamchand Gupta Vocational College, Khandwa (DAVV, Indore) | 2007

Location: Stamford, CT 06901 (EDT/EST)
