Application Server	Tomcat, WAMP5/XAMPP
Database	MySQL, Oracle 8i
IDE Tools	Notepad++, MyEclipse, Macromedia Dreamweaver8

Projects with District Arts and Education Stamford, CT

June 2025 to November 2025

Cybersecurity Compliance Checker (with Security Risk Register with Heat Map)

(DAE semester_3,4,5 project (Aug-Oct 2025))

This project aims to build a web-based cybersecurity compliance checker that analyzes uploaded policy or configuration files against industry-standard frameworks (e.g., GLBA, NIST CSF, PCI DSS, etc). It automatically identifies non-compliant items, generates a security risk register, and visualizes the risks using a dynamic heat map, helping organizations prioritize and remediate security issues efficiently.

WordSearch game (DAE semester_1 project (July 2025))

This project is about the interactive word search, in which we will ask 3 words from the user and rest of the 7 words from my predefined list. On the base of these total 10 words, the word search grid will be arranged using my Python program.

This grid will be shown on the left side of the GUI. On the right side of the GUI, there will be an input box, below that it will be a timer, and there will be the list of 10 words with a cross or tick. So, as soon as the user starts working on it, they will start the timer, and if the user successfully found a word, then the word will automatically turn green in the list.

MEDIKIGAI INC

2024

Medical Document Analyst

Involved in data analysis and reporting of patient reports, lab testing results, hospitalization, physician notes, etc. Worked within the healthcare team to ensure data reporting and reconciliation.

PHP PROJECTS UNDERTAKEN

2013 – 2014

Maven Group, Hyderabad, India

Role: PHP Web Developer & Designer

Created an advertising website for a client which included analysis of project, development of web pages, connecting to database, and testing functionality.

Roles and responsibilities -

- Involved in designing the user interface mainly focusing on easing access to registration, plans, and features available on the website using HTML and CSS; which include features like sliders, iframe, and lightbox, etc. Built and maintained SQL database connection. Programmed and tested online web forms.
- Implemented validation control on the web pages using JavaScript and JQuery framework.
- Experience with web debugging tools (Firebug, Fiddler debugging tool). Used JSON in the ajax communication.
- Managed the development of website applications including the integration of functional specifications, interface design, coding, and testing.
- Provided ongoing support for website applications including programming support for site enhancement and technical support to members.

Environment: MySQL, JavaScript, jQuery, AngularJS, PHP, Html5, Git, Adobe Dreamweaver.

VOLUNTEER EXPERIENCE

April 2022 to Dec 2022

GOPIO CT and American Hindu RCO

Salesforce Admin + Developer

I worked as an admin, developer, and QA for both the below organization's website and enhanced the digital experience of the community-developed LWR (Lightning web runtime).

Roles and responsibilities -

- Involved in all phases of the Software Development Life Cycle (SDLC) starting from requirements gathering and design. Managed LWR sites using workspace and builder.
- Developed responsive lightning web components with custom CSS for the LWR community site and managed guest user profiles. Created apex classes, trigger, and test classes accordingly.
- Worked on flows to collect data from end users, using free-form screen, assignment, get records, delete records, create records, update records, decisions, send email action, etc.

GOPIO-CT is the Connecticut Chapter of the Global Organization of People of Indian Origin and serves as a non-partisan, secular, civic, and community service organization – promoting awareness of Indian culture, customs, and contributions of PIOs through community programs, forums, events, and youth activities. <http://gopioct.org/>

Hindu Religious & Cultural Organization (American Hindu RCO, Inc.) and Wilton Hindu Temple to support Hindu immigrants arriving in the United States. <https://learner-7c-dev-ed.my.site.com/whindutemple/>

FREELANCING PROJECTS

Sep 2012 – Sep 2013

Upwork Freelancer - Multiple mini projects

- Paypal integration in “omnisleep.in”

This work includes shopping cart implementation. Add to cart, remove from cart, and google checkout using simpleJS API. Here, user can navigate to different products and if he/she like can add to cart and then delete from cart or checkout paying the calculated amount. The products will be delivered to the given address.

- Web designing and development in “kii3.com”(testing url).

Kii3 is a portal for tourist management system. User can browse, find appropriate tourist places, hotels, distance, and directions. User can book the hotel/resorts from this website. (Developed web pages using html, javascript, css, ajax, jquery and php using XAMPP and dreamviewer.)

- Web designing and development in “<http://foxotic.com/>”.

Developed web pages using html, javascript, css, ajax, jquery and php using XAMPP and dreamviewer.

- Paypal integration in “phplinkdirectory.com”,

Help-on.net is a link management directory. Here website owners can submit link of their website to promote their business. This work includes removing a link on demand from link owners. Here submission of link is free of cost but while removing link owner has to pay some fee depending on the options provided by directory owner. Fee is collected from link owners via PayPal. Here technologies involved are: web development, smarty, php, html, javascript and mysql.

- Trainer (remote) University of Pakistan virtual program (vu.edu.pk).

This work included teaching and explaining projects to final year university students using Android simulators. They had projects with minor mistakes; I provided direction and guidance via skype. Also developed video tutorials for reference and study.

EDUCATION CREDENTIALS
